

**NEW FROM
STOROPACK!**

Versatile Functionality

Cushioning

Void fill

Dunnage

More than environmentally friendly, PELASPAN™ BIO offers the enhanced functionality of Storopack's proprietary "S" shape loose-fill design making it ideal for packaging applications. This special shape interlocks within the container offering stronger cushioning, reduced migration and increased stability. Combine that with the environmental benefits of this corn and potato starch loose-fill and you have the perfect packaging solution.

PELASPAN™ BIO is economical because it's derived from annually renewable resources, so manufacturing costs are not affected by the ever-increasing price of petroleum based resins. Protecting your packages and the environment, PELASPAN™ BIO is made using a corn and potato starch mixture which is 100% biodegradable. It's fully compostable without residues, and disintegrates in water without polluting groundwater. What more could you ask for?

Storopack

PELASPAN™ BIO

The Optimum Environmental Loose-Fill Solution

- Economical
- Made from renewable resources
- Fully compostable
- Fast — speeds production
- Light, clean and free-flowing
- Requires little or no training

STOROPack

Delivered, Stored and Dispensed with Speed, Productivity and Reliability

Storopack delivery systems are essential in high volume shipping environments where speed, productivity and costs are critical. The largest packaging facilities in the world rely on Storopack for high-performance, high-speed loose-fill delivery systems.

OUR DELIVERY FROM THE TRUCK...

Bulk trucks load PELASPAN™ BIO directly into your delivery system quickly and efficiently, keeping your production lines working at full capacity.

A bulk loaded Gravity system releases loose-fill to the packing stations on-demand

Also available in bags

Our overhead dispenser system is convenient and portable.

TO THE PACKING STATION

The Whisper system moves PELASPAN™ BIO along a cushion of air, maintaining the integrity of the materials for packaging while delivering the product as needed to multiple dispensing stations. PELASPAN™ BIO can also be delivered in bags, then stored and efficiently dispensed from one of our standard overhead portable dispensers.

CUSTOMIZED SYSTEMS

Every customer has different requirements in their packaging environment. Storopack consults with you to understand these needs and then engineers a customized system built using its industry-proven core components.

The Strength of PELASPAN™ BIO

Storopack is the world's largest manufacturer, converter and recycler of loose-fill products, most commonly known as peanuts. Storopack's proprietary "S" design interlocks within the

packaging container for stronger cushioning, reduced migration and increased stability.

Reduce – Reuse – Recycle

Storopack participates in a nationwide loose-fill recycling program. All Storopack facilities collect post consumer EPS packaging for reuse and recycling. Together we can protect your packages while protecting the environment. Call or visit the web site for details. 800.828.2214 www.loosefillpackaging.com

Whatever You Need to Pack: Think Storopack

- **PELASPAN™ BIO** Loose-fill
- **PAPERplus®** paper cushioning material
